IN THE CLAIMS

Amend claim 1 as follows:

1. (Amended twice) A combination comprising:

- B1
- a) at least one adhesive sheet comprising a top adhesive face, a bottom adhesive face, and four sides;
 - b) a UV-impermeable material applied to at least each of said faces or entirely enclosing said at least one adhesive sheet;

wherein at least one of said top adhesive face and said bottom adhesive face comprises a pressure sensitive adhesive composition based on an elastomer resin;

wherein said at least one adhesive sheet can be released from a substrate to which it has been adhered by stretching said at least one adhesive sheet in the direction of a bond formed between said at least one adhesive sheet and said substrate; and

wherein the UV-impermeable material comprises at least one of the following:

- i) at least one UV-impermeable release liner sheet applied to and covering at least said top adhesive face and said bottom adhesive face over their entire adhesive areas;
- ii) a UV-impermeable individual adhesive sheet package comprising a package of UV-impermeable material completely enclosing one of said adhesive sheets in UV-impermeable material; and
- iii) a UV-impermeable outer package comprising an outer package of UV-impermeable material completely enclosing at least one of said adhesive sheets in UV-impermeable material, wherein said outer package further comprises at least one transparent packing element.
